## **A success for Opus at Automässan 2008: Opus emission testers are approved by the Finnish Vehicle Inspection**

**During the Automassan 2008 exhibition Opus has been informed that A-Katsastus, the Finnish equivalent of Svensk Bilprovning, has approved the Opus gas analyzer for light vehicles. This approval is a brake through for Opus and its distributor Suomen Tyokalu Oy in the Finnish market.**

In the spring of 2007, Opus and Suomen Tyokalu Oy started their partnership aimed at distributing emission control test equipment for gas and diesel vehicles in Finland. A-Katsastus has approved the Opus systems after numerous testing. This successful approval will generate a large potential of sales in the Finnish market and throughout Scandinavia.

Opus booth during the Automassan 2008 exhibition has been visited by many companies and organizations from Northern Europe and Russia. Beside the positive news from A-Katsastus, Opus has received indications from its other Nordic distributors that the volume of orders in these areas should increase in the near future.

-- "It is a great satisfaction for Opus to get the approval from A-Katsastus, this proves, once again, that our systems belong with the best ones offered on the market. Our market position is once again strengthened as the leading manufacturer in the Nordic territory. This also explains why we have acquired the Swedish service company J&B Maskinservice in 2007" says Magnus Greko, managing director and marketing director of Opus.
