Opus daughter company EWJ Svenska AB signs two-year contracts with Bilprovningen

EWJ Svenska AB (EWJ) daughter company in the Opus Group has signed contracts with the Swedish Vehicle Inspection Company AB Svensk Bilprovning (Bilprovningen) for delivery and installation of brake testers for light and heavy vehicles and delivery of play detectors for heavy vehicles.

The contracts are a two year extension of two earlier contracts that EWJ have had with Bilprovningen. The new contracts secure EWJ as the main supplier of the above mentioned products during the period. The contracts will be a major contribution to the turnover in EWJ during the period.

Brake testers are used to check the functionality and condition of the vehicle brakes and Play detectors are used to check the joints in the steering and the front wheels.

EWJ has for the last 15 years been the main supplier of test equipment to Bilprovningen. During this period EWJ has supplied several products such as brake testers, head light testers, play detectors, wheel spinners and tools.

In addition to the above mentioned contracts EWJ has signed another agreement with Bilprovningen for upgrading of software in approx. 100 existing EWJ and HPA brake testers. The upgrade is connected to a new directive from the Swedish Road Association.
